

Specialty Care NEWS!

**“One Small Step for the Riverside University Health System;
One Giant Leap for Access to Specialty Care!”**

The Multi-County eConsult Initiative at IEHP is pleased to announce that eConsult has been live at Riverside University Health System since March 1st with 5 RUHS clinics currently live on eConsult. Special thanks to the following providers who are live on eConsult and pioneering this initiative at a primary care level!

Banning Family Care Center – Dr. Edward Bacho and Dr. Tulin Sinjar

Internal Medicine Clinic – Dr. Debra Stottlemeyer, Dr. Christina Kim, Dr. Lynetta Skortez, and Lindsey Block

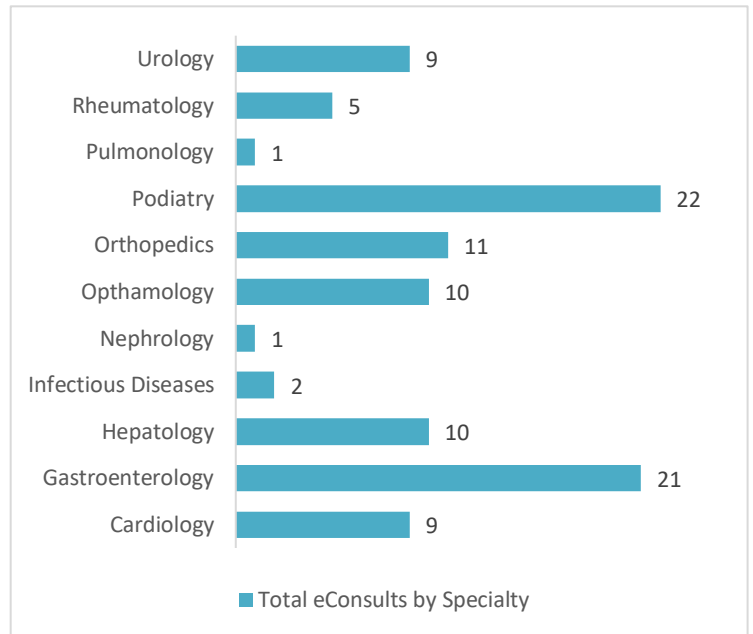

Rubidoux Family Care Center – Dr. Pooja Bhojak

Riverside Neighborhood Health Center – Dr. Biplav Yadav

Hemet Family Care Center – Brett Grundell

These launches represent an exciting milestone in the effective delivery of specialty services to our patients. We are grateful to our partners Riverside University Health System for their sponsorship over the past 11 months of eConsult work. We also appreciate our committed specialty reviewers whose response to the initial request for assistance on average has been less than 24 hours.

We want to acknowledge the efforts that our primary and specialty teams have put forth in expanding the scope of care for Inland Empire patients.

Our eConsult Specialist Champions participating in go-live are:

Cardiology	Dr. Kenneth Jutzy & Dr. Rajagopal Krishnan
Endocrinology	Dr. Iqbal Munir & Anthony Firek
Infectious Diseases	Dr. Made Sujita
Gastroenterology	Dr. Andrew Wright
Hepatology	Dr. Lydia Aye
Nephrology	Dr. Jay Agarwal
Podiatry	Dr. Jonathan Labovitz
Rheumatology	Dr. Vaneet Sandu
Urology	Dr. Edmond Ko
Pulmonology	Dr. Destry Washburn

Calling ALL Primary Care Providers

Our Specialty Primary Care (SPC) Workgroups are an important part of ARMC & IEHP’s efforts to improve specialty care delivery. We are always interested in feedback from Primary Care Providers. Contact Jessica Ayala (Ayala-J2@iehp.org) if you are a PCP interested in being part of a workgroup.

WHAT IS eCONSULT?

It is a telehealth¹ process enabling primary care providers (PCPs) to consult remotely and conveniently with specialists. eConsult has successfully reduced the need for face-to-face office visits by facilitating efficient exchange of information to meet clinical needs.²

BENEFITS OF eCONSULT		
Patients	Primary Care Providers	Specialists
<ul style="list-style-type: none"> Improved timeliness of access to specialty care Improved health outcomes with earlier specialist intervention Improved patient satisfaction due to decreased wait time for specialty appointment 	<ul style="list-style-type: none"> Improved communication between primary care provider and specialists Expanded scope of primary care practice Increase in high-quality, coordinated care by creating patient centered medical neighborhood^a 	<ul style="list-style-type: none"> Improved pre-visit work-ups Decrease in unnecessary/inappropriate specialty referrals Reduced "no-show" rates

The Safety Net eConsult Program will be implemented over an 18-month timeframe.

WHY eCONSULT?

In preparation for an influx of patients due to federal health care reform and California's 1115 waiver, IEHP is committed to helping safety net providers increase capacity and improve efficiency and access to care.

This expansion of eConsult to the Safety Net is predicated by a successful 18-month pilot conducted between June 2009 through December 2010 with small and solo physician practices, which resulted in:

- An approximately 60% reduction in wait time for appointments
- Out of 829 specialty face-to-face referral requests, about half (383) were appropriately addressed and resolved by eConsult and did not result in face-to-face visits
- An easy to use and flexible system allowing specialists to respond to eConsult email alerts in three days or less
- PCPs feeling more comfortable and better equipped to address the specialty needs for their patients²

For more information please e-mail www.iehp.org

HOW DOES eCONSULT WORK?

- eConsult begins when the primary care provider's (PCP) office requests a specialty consult. Basic patient demographics and past clinical information is available for specialist review.
- PCP submits brief history of patient's present medical condition, pertinent clinical information and specific clinical question(s) that need to be addressed.
- HIPAA compliant email alerts are sent to the specialist's private email.
- Through a secure email alert, the specialist can review and respond to the PCP. The specialist can provide patient care advice or treatment recommendations, upload educational documents, or recommend a face-to-face visit.
- An email alert is then sent to the PCP informing him or her that the eConsult has been reviewed. Further communication can continue until sufficient information is exchanged to address the patient's medical condition.
- If the patient requires a face-to-face visit, then the eConsult information is routed to the respective existing authorization systems.

¹ Telehealth is the delivery of health-related services and health information via telecommunications technologies. ² Pilot survey data from June 2009 – December 2010.

³ Community Partners Clinics are private non-profit clinics that are contracted with L.A. County Department of Health Services through the public private partnership program to serve uninsured or underinsured patients.
