

News & Updates

April 2020

Leverage eConsult during this coronavirus pandemic, review your contribution to the Multi-County eConsult Initiative (MCeI) for April, and discover what's in store for May.

#eConsult First

#eConsultfirst

Improve the outcomes of specialist visits for your patients by reviewing the case first with our eConsult specialists. Either they can help your patients avoid visits altogether by providing a care plan for more benign conditions, or save your patient's time by guiding you to get pre-evaluation testing and labs done prior to the in-person consultation.

Get the care your patient needs in a more efficient way, while helping them avoid unnecessary exposure to the coronavirus.

The MCeI team is here to support you every step of the way. Thank you for your continued service, sacrifice, and strength.

COVID-19 in the Inland Empire

The website features an assemblage of news releases, links & videos, dashboards, maps and statistics about the San Bernardino and Riverside counties (compiled from publicly available sources).

Over 50,000 eConsults!

RUHS primary care clinics & CHS play a major role, having submitted **526 eConsults** this month alone, and **16,797 eConsults** since MCeI's genesis.

Your Month in Review

Bettering Patient Care

Percent of eConsults closed out non-face-toface for RUHS patients in April:

Your efforts are improving patients' access to appropriate care!

By coordinating with 34 specialist reviewers via eConsult, 121 providers at 19 RUHS clinic sites succeeded in resolving **87 cases** without the need for an in-person visit this month.

Over half of eConsults for endocrinology, geriatrics, and infectious disease services were resolved between providers on the eConsult platform. By coordinating with specialists sooner via eConsult, primary care providers are helping reduce delays for patients to obtain clinically necessary care.

Remember: Clinics providing virtual or telephone visits qualify as IEHP encounters if the visits are tracked and provided to IEHP in data submissions.
